

# Pat-Add AF 183

NEXT-GEN DEFOAMERS: PFAS-FREE FOR A SAFER TOMORROW

Pat-Add AF 183 is designed specifically for high performance solventborne applications. Pat-Add AF 183 not only supports PFAS-free formulations but also effectively eliminates foam without compromising clarity and gloss.

- Outstanding deaeration in high risk air inclusion applications like roller or airless spray
- Excellent balance between compatibility and effective defoaming
- Maintains clear film appearance
- Best for varnishes/clearcoats and high gloss topcoats

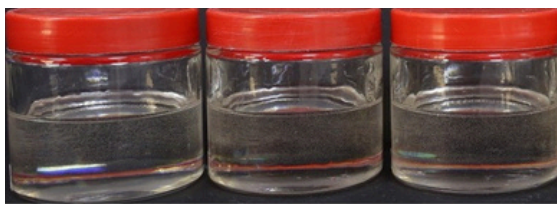

## COMPATIBILITY IN SB CLEAR COATS

Blank                      PFAS                      AF 183

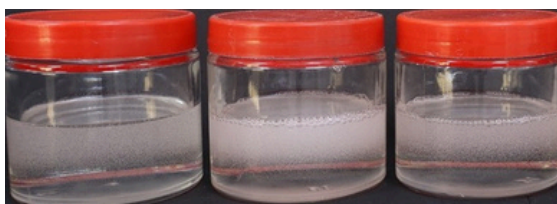

2K PU Clear

Epoxy Clear

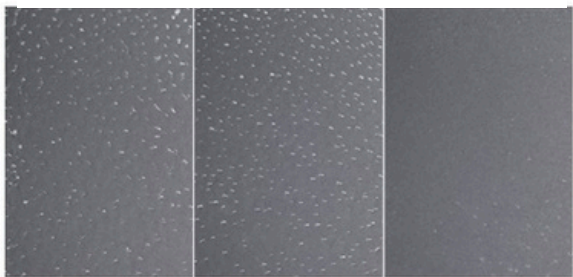

Acrylic Melamine Clear

### Acrylic Melamine Clear

Defoaming performance after mixing at high speed

Blank                      PFAS                      AF 183

### RECOMMENDED DOSAGE:

0.1-0.8% on total formulation

### STAGE OF ADDITION:

Millbase and Letdown

### APPLICATION:

- SB Architectural Coatings
- SB Wood Coatings
- SB General Industrial Coatings
- SB Marine and Protective Coatings
- SB Automotive Coatings
